CTSI Acquires Selected Assets from AVC

Chantilly, Va., September 3, 2013 - Corbett Technology Solutions, Inc. (CTSI) was proud to announce Tuesday its plans to acquire selected assets from Applied Visual Communications, Inc. (AVC). CTSI recognized that bringing on board some of AVC's most talented individuals would create a dominant firm in the mid-Atlantic region. Increasing CTSI's overall manpower allows them to better serve all collective clients.

AVC was named Integrator of the Year in 2012 by Commercial Integrator Magazine and brings a great lineup of 25 talented and dedicated engineers, sales professionals and installers to an already accomplished CTSI team. Their skills, experience, certifications and dedication to their clients will bring many benefits to existing customers. "AVC has been a well respected firm for years in the audiovisual industry and their customer service is on par with CTSI's philosophy. We are thrilled about the outcome," stated Gino Ruta, Senior Vice President for CTSI.

By week's end both firms anticipate transitioning smoothly into their new arrangement while continuing to serve their clients. This new knowledge and talent base will bring many benefits to existing customers and in just a few short weeks this transition will be seamless and beneficial to all.
